ABOUT ME

Electronics and Communication Engineering graduate with experience in **Computer Vision, AI data annotation, Python, IoT, and embedded systems**. Skilled in **AI dataset validation** and **microcontroller-based development**, with interests in **AI, software, and core engineering roles**.

EDUCATION

Bachelor of Engineering (Electronics & Communication Engineering) 2022 – 2026 **CGPA: 7.66**

KLS VISHWANATHRAO DESHPANDE INSTITUTE OF TECHNOLOGY, HALIYAL (VTU)

PUC (PCMCS) | 2022 **70.83%**

PRISM PU SCIENCE COLLEGE, DHARWAD

SSLC – Vimal V Deshpande School Of Excellence, Haliyal | 2020 **66%**

EXPERIENCE

COMPUTER VISION DATA ANNOTATION AND AI ANALYST INTERN

Jan 2026 – May 2026

Trainee Engineer | ARCTICTERN SOLUTIONS PVT LTD

- Worked on large-scale Computer Vision datasets, annotating and validating 20,000+ image frames for machine learning model training.
- Managed end-to-end dataset workflows, including preprocessing, structured data handling, labeling, and updates using internal tools.
- Ensured high dataset accuracy and quality through systematic review, error correction, and attention to detail while meeting strict deadlines.

PATENT & INNOVATION

ENHANCED THERMOELECTRIC COOLING SYSTEM USING Peltier Module with Optimized Proprietary Coolant and Intelligent Control Architecture

Published Indian Patent – Co-Inventor

- Co-inventor in a team of three for an innovative thermoelectric cooling system designed to enhance thermal efficiency through intelligent control mechanisms.
- Developed an optimized coolant and control architecture for improved cooling performance and thermal management.
- Patent Application No.: **202641046492 A**
- Publication Journal No.: **17/2026**
- Publication Date: **24 April 2026**

PROJECTS

Peltier-Based Non-Conductive Liquid Cooling System.

- Developed an **ESP8266-based IoT cooling prototype** with real-time temperature monitoring and wireless tracking.
- Designed a safe, non-conductive liquid cooling mechanism for efficient thermal management.
- Selected for presentation at **COMEDKARE Innovation Hub** and showcased on LinkedIn.

Thermal Conductivity Measurement Device.

- Developed using ESP8266 and waterproof temperature sensors.
- Designed a cost-effective thermal testing setup for basic thermal analysis.

SKILLS

- Programming: Python, C, C++, Embedded C (8051), OOP.
- AI & Data: Computer Vision, Machine Learning Fundamentals, Data Annotation & Validation, Generative AI, Prompt Engineering.
- Embedded & IoT: ESP8266, Arduino, Sensors, Microcontrollers, Hardware Testing & Validation.
- Tools: VS Code, Git, Arduino IDE, Keil µVision, MATLAB, Multisim, MS Excel.
- Soft Skills: Communication, Analytical Thinking, Problem Solving, Team Collaboration.

CERTIFICATIONS

- Foundations of Prompt Engineering – AWS Training & Certification.
- What Is Generative AI? – LinkedIn Learning.
- Introduction to Artificial Intelligence (AI) – IBM (Coursera).
- Innovation Management – Fundação Instituto de Administração.
